Github: https://github.com/willthbill **LinkedIn**: https://bit.ly/linkedin-wbm
Personal website: https://willthbill.dev

Software engineer and ex-founder with a strong background in algorithms and high-performance systems, skilled at writing clean, correct, efficient code quickly. Fluent in English and Danish.

Skills

- **Algorithms and optimization**: IOI, ICPC EUC, national champion. Skilled at writing correct, efficient code quickly.
- **Software design**: Designing modular, maintainable systems. Experience with projects in the 10k–200k LOC range.
- **High-performance systems**: Rust and Python. Built ultra-fast real-time data pipelines and ML inference in production.
- **Data engineering**: Hands-on with Rust, Python, Polars, S3, Postgres, Prefect, and servers. Built and maintained datasets, performed feature engineering, and created dashboards for trading signal analysis.
- **Bash, Linux & DevOps**: Comfortable running servers, writing automation scripts, using Docker, and handling basic security tasks.
- **Machine learning**: Used PyTorch for small neural nets, LGBM, and Hugging Face models; integrated models into pipelines.
- **AI agents**: Built full-stack AI agent apps using Lovable and LangGraph; experience interacting with LLMs via APIs.
- **Full-stack development**: Capable of building complete applications (frontend + backend + DB), but not my main focus.
- **Currently learning:**: CUDA, Infrastructure-as-Code, observability platforms (e.g., Datadog).

Education

- **University of Copenhagen** Sep. 2020 - Aug. 2023
  Bachelor of Science (BSc) in Computer Science. Grade: 12 (equivalent to A+)

Experience

- **Co-founder of Dafnis ApS** Aug. 2023 - Jun. 2025
  A fully automated power trading firm using machine learning and algorithms to trade power across Europe. Utilizing a modern, high-performance tech stack, written in Rust. Responsible for fast data pipelines and backtesting systems.
- **Researcher at University of Copenhagen** Sep. 2023 - Feb. 2024
  Using MILP in Computational Geometry. C++.
- **Full-stack Student developer at Jobindex** Feb. 2021 - Jan. 2022
  Tools: MySQL, Perl, Vue.js
- **Trainer at Dansk Datalogi Dyst** Oct. 2020 - Sep. 2022
  Deputy leader at IOI 2022. Vice chairman of the technical committee of BOI 2023.
- **Frontend Student Developer at Arnvind Group** Apr. 2019 - Mar. 2020
  Tools: React. Responsible for a large, complex web-app.

Awards and Achievements

- **Winner of Danish AI Championships 2024** Oct. 2024
  2nd place in 2022 and 2023. http://bit.ly/3VAiTfi
- **Winner of Danish Programming Championships 2023** Oct. 2023
  ICPC-style Competitive Programming. 3rd in Scandinavia. http://bit.ly/4nOrzKP
- **ICPC EUC: Top 58% in 2024** Mar. 2024
  ICPC European Championships. https://bit.ly/euc-wbm24
- **IOI: Top 52% in 2020** Sep. 2020
  International Olympiad in Informatics. Participant in 2019 and 2020. http://bit.ly/42bSjN9
- **PRACE 'Best Computational Project' 2020** Sep. 2021
  PRACE Award at EUCYS (European Science Championships) 2020. Efficient Graph-based Image-segmentation. http://bit.ly/42ap2T0
- **Winner of Computational Geometry Challenge 2023** Jun. 2023
  "World Championships in Geometric Algorithms" – an international research competition (CG:SHOP). Media coverage in National Radio and Newspapers: videnskab.dk. https://bit.ly/scienceku-wbm23
- **Master Title on CodeForces**: Top 1600 in the world. https://bit.ly/cf-wbm
- **Finalist in the Danish Cyber Championships 2022**: CTF Competition.

Projects & Publications

- **ExtensionCC**: An efficient Convex Cover algorithm developed for CG:SHOP 2023. Publication: https://bit.ly/SoCGpub-wbm23. Bachelor-thesis: https://bit.ly/ba-wbm
- **Fast Graph-based Image Segmentation**: EUCYS project. See more at https://bit.ly/eucys-wbm
- **Pacup**: Open-source tool unifying Linux package managers and making systems reproducible: https://bit.ly/pacup-wbm
- **Opener.nvim**: Open-source Neovim plugin for workspace / context switching: https://bit.ly/opener-nvim
- **Codify**: Chrome extension with over 10000 installations. No longer available.
